**Profile**
I am a technology professional specializing in healthcare system integrations, with a primary focus on HL7 FHIR, HL7, and JSON. My experience includes developing and maintaining monolithic and microservices architectures to facilitate seamless healthcare data exchange between systems.

**Experience**
**Entry-Level Software Developer**
December 2022 – Present

- Maintenance and development of healthcare system integrations using HL7, JSON, and HL7 FHIR.
- Worked with both monolithic and microservices architectures to meet the needs of the healthcare sector.

**R&D Software Developer Intern**
November 2021 – November 2022

- Maintained healthcare system integrations using JSON in a monolithic architecture.
- Contributed to requirements analysis and implementation of continuous improvements.

**Education**
FURB (Regional University of Blumenau)
Bachelor's in Information Systems
Expected graduation: January 2026

**Technologies**

- Languages and Frameworks: Java, Spring Boot
- Databases: SQL Server, MySQL
- Tools and Infrastructure: Docker, Redis, Apache Kafka
- Architecture: Microservices, Monolithic

**Languages**

- Portuguese: Native
- English

**Skills**

- Effective communication and teamwork
- Fast learner
- High productivity
- Deadline management
- Requirements analysis and continuous improvement
